

## SmartStream Coordination Meeting Minutes February 7, 2006

Attendance: Sophia Bedard, Pete Bostian, Ken Dinsmore, Cindy Farling; Ed Green, Mel Lambert, Cathy McClintock, Jim Racheff, Mark Testerman

1. SmartStream Version 7.0: Pete reported 7.0 has been installed on Mel Lambert's computer for testing. Mel reported that she has been running some jobs and experienced minor issues and found some solutions. She noted that when a user goes into the PO activity windows the user name defaults for FCRF but if the user changes to GRP1 just their user id appears with no alternative selections from the drop down.

Pete noted another problem from the SmartStream list server - vendor ID's are not uppcased in the file open search even though they are always uppcased in the data entry activities.

Pete noted he opened a case two weeks ago on ODBC connectivity with the Sybase open client 12.5.2 and he has yet to get a response. He also noted that response times re cases has been slow to non-existent which may be due to the recent sale of GEAC.

Sophia reported she has re-opened a case for the requisition load re saving a purchase order between lines – all requisition lines transferred before the save have their comments formatted correctly but any lines transferred after the save are transferred without formatting. When we originally opened this case, GEAC informed us that the problem was resolved in 7.0 but Sophia has discovered the problem still exists in 7.0. She also has not heard back on this case.

All of these issues will need to be resolved before 7.0 can be placed into production.

2. Subcontracting Plan Revisions: Pete reported he met with Donna Follin and Cindy Farling regarding the subcontracting plan to explore modifications to the currently generated spreadsheets and the requested modifications have been completed.

3. Web Reports: Pete noted that some of the administrative systems inquiry reports written in Access will soon be converted to Web reports.

The next meeting will be held **TUESDAY, MARCH 7, 2006**, at 9 AM in the Building 362 conference room. This meeting has been rescheduled due to conference room status.
